Optional Examinations

*Added 23,000 won for optional examination fee

Abdomen	Colonoscopy In case of conscious sedation endoscope, an extra charge of 115,000won is added	230,000won
	Abdominal CT Thorough examinations for various disease states and cancers of organs such as liver, pancreas, gallbladder, kidney, and adrenal glands	322,000won
	Abdominal MRI Thorough examinations for various disease states and abdominal cancers utilizing contrast between tissues	1,058,000won
	Liver Fibro · Fat Scan · Identifying the extent of fatty liver disease and liver cirrhosis by painlessly measuring the degree of firmness(elasticity) of the liver in an objective and quantitative manner	103,500won
Heart · Coronary Artery	Coronary Artery Calcium Scoring CT Screening test for calcification of coronary arteries which supply blood to the heart.	172,500won
	Coronary CT Angiography A thorough examination for stenosis or occlusion of the coronary artery which are common reasons for angina and myocardial infarction	402,500won
	Echocardiography Assess the size, movement, and valve abnormalities of the heart	287,500won
	Carotid Artery Ultrasound Carotid arteries (neck area) are major blood vessels that supply most of the blood to the brain and are useful in predicting cerebrovascular disease	207,000won
	Exercise Stress Test(Treadmill) Diagnosis of coronary artery disease or arrhythmia by attaching electrocardiogram to the chest and analyzing symptoms or change in electrocardiogram during the graded exercise test	115,000won
	Central Arterial Pressure Useful tests to assess the risk of cardiovascular disease by measuring the pressure and waveform of the central artery (Aorta, the largest vessel) and peripheral arteries	80,500won
	Arterial Stiffness and Stenosis Test(Ankle-Brachial Index(ABI)) Test to measure the elasticity of blood vessels and precipitates in endothelium and to check occlusion of blood vessels of all four limbs through taking blood pressure, electrocardiogram, and checking heart sounds	69,000won
Lung	Low Dose Chest CT Lung cancer screening test with low radiation levels compared to conventional lung CT	207,000won
Brain	Brain MRI + MRA Check for brain tumors, degenerative changes and stenosis, obstruction and cerebral artery 'aneurysm	1,265,000won
Whole Body	PET-CT(Non-Contrast) Screening cancer cell in the whole body through analysis on glucose metabolic rate of different organs	1,150,000won
Whole Body + Brain	PET-CT Torso + Brain (Non-Contrast) Thorough examination utilizing images of glucose metabolism of tissues to test brain function and for cancer in the whole body	1,725,000won
Prostate	Prostate Ultrasound Check for benign prostate hyperplasia, prostatitis, and prostate cancer by anal insertion of ultrasonic equipment	207,000won

Thyroid	Thyroid Ultrasound Check for thyroid cyst, nodule, and cancer or cervical lymph node abnormality	207,000won
Breast	Breast Ultrasound Check for breast cyst, nodule, and cancer or axillary lymph node abnormality on both sides	207,000won
Pelvis	Gynecologic Ultrasound Identify gynecological diseases such as diseases of the uterus and ovaries, abnormal shape and location of the fallopian tube, tumors, uterine myoma, and ovarian cysts	172,500won
	HPV(Human Papilloma Virus) Identify the presence and a type of viruses which are risk factors for cervical diseases such as cervical cancer	69,000won
	Anti-Mullerian Hormone(AMH) This test predicts the possibility of fertility, menopause, and polycystic ovary syndrome.	69,000won
Muscles/ Skeletal system	Bone Densitometry Diagnosis of osteopenia and osteoporosis	69,000won
	Cervical Vertebrae Screening SET [X-Ray + MRI] Through examinations to check the structures of the vertebrae, surrounding muscles, and the presence of discs and nerve root compression when there is a pain in the cervical spine and/	805,000won
	Lumbar Vertebrae Screening SET [X-Ray + MRI] or lumbar spine or when neurologic symptoms are present	805,000won
	Knee (joint) test SET [X-ray + MRI] *Choice between right and left side Thorough examinations to check exudates in the joints and abnormalities of the ligaments, cartilages, meniscus, and bones when there is discomfort or pain in the knee	828,000won
	Soft tissue Ultrasound Test for fatty layer and muscles under the skin, which is done when there is a superficial shallow lesion	69,000won
	Body	3D Analysis Your entire body is scanned to identify how well it is aligned from front to back and left to right, your posture, body ratio and balance.
Functional Medicine	Natural Killer Cell Activity Test Testing for evaluating the activity of Natural killer cells which remove abnormal cells infected by virus or cancer cells as the component of the innate immune system	138,000won
	Active Oxygen and Antioxidant Ability Test Testing for measuring the amount of active oxygen which causes a harmful effect on health and evaluating antioxidant ability which removes active oxygen	115,000won
	Intestinal Bacteria Analysis Test that examines beneficial and harmful bacteria in the intestines	207,000won
Allergy	61 Types of Allergies (MAST-Multiple Allergen Screening Test) Cause analysis of acute allergy to various external factors	195,500won
Gene	Telomere This test measures the health and aging state of cells with information about telomere gene length	345,000won
